BOTTLE VAULT(TM)

User Guide

From first bottle to finished vault.

Learn how to add, organize, find, share, and enjoy every wine and spirit in your collection.

BOTTLE VAULT FREE

- Unlimited manual bottle entry
- 20 lifetime successful AI label scans
- Private cloud backup with a confirmed account

BOTTLE VAULT

Your entire cellar,
organized.

See every bottle, storage location, and collection value at a glance.

Create and protect your vault

1

Create your free account

Use your email and a secure password during the introduction. Confirm the email before relying on cloud sync.

- Your account keeps your collection, label photos, and scan allowance connected to you. Every shared-vault member uses their own
- Bottle Vault account.
- Never share a password.

2

Check cloud sync

Open Settings and look under Account & Cloud Sync. The most recent successful sync time appears below your email.

- Tap Sync now after another person changes a shared vault.
- Wait for Synced before closing the app after major edits.
- Use Forgot password if you lose access.

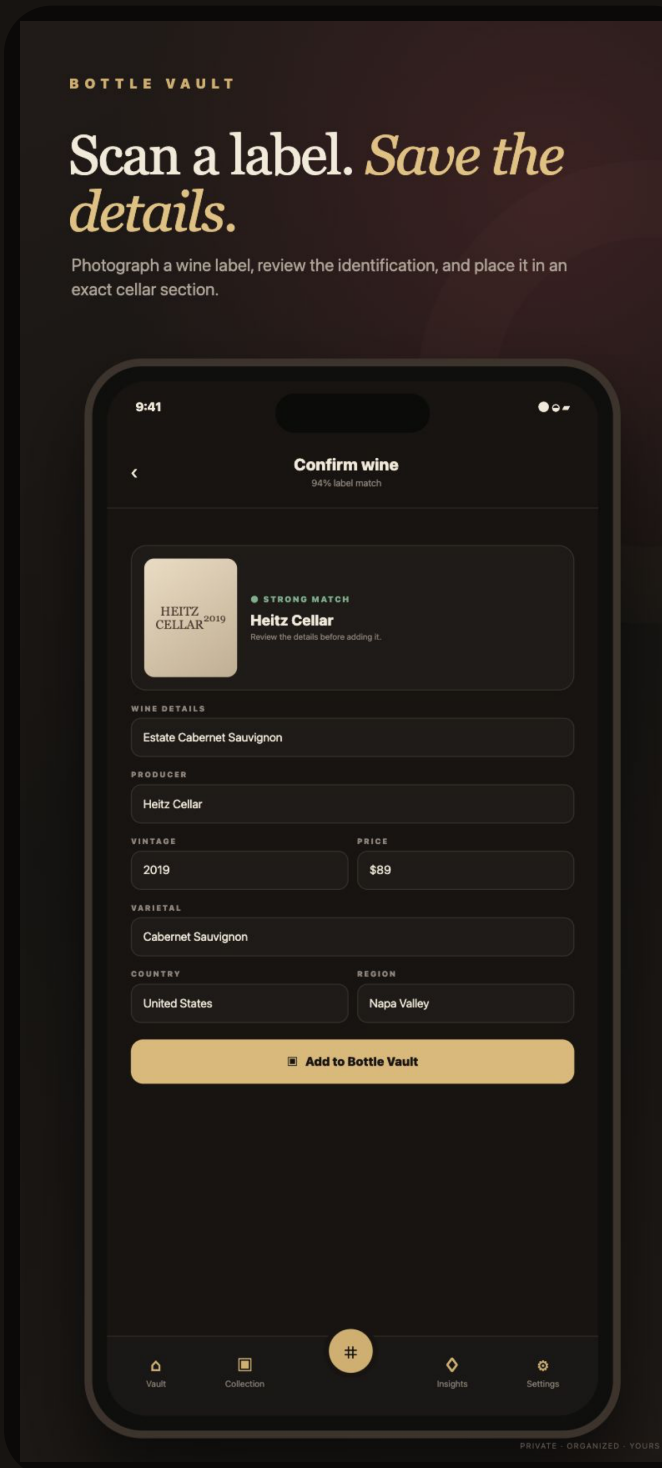

3

Build your first storage

Name a cellar, wine refrigerator, rack, or spirits cabinet and match its rows to your real storage.

- Rows are numbered.
- Choose single-depth or front-and-back layouts.
- You can rename and edit storage later.

Scan quickly or enter manually

4 Tap Add Bottle

Use the labeled center button at the bottom of the app. It opens all three ways to add a bottle.

- Take a photo for AI label recognition.
- Choose an existing label photo.
- Enter details manually.

5 Understand the free allowance

Bottle Vault Free includes 20 lifetime successful AI label scans and unlimited manual entries.

- Failed recognition attempts are not counted when Bottle Vault can verify the failure.
- A manual bottle can still have a label photo.
- When scans are finished, manual entry keeps working.

6 Review before saving

AI details, price estimates, and drinking windows are editable suggestions. Correct anything the label photo could not establish.

- Enter quantity once for identical bottles.
- One label image represents that quantity.
- Choose the exact cellar section or keep copies
- Unplaced.

Put every bottle exactly where it lives

7 Place each physical copy

After saving, choose an open position. Quantities greater than one can be placed one copy at a time.

- Back and front sections can have different capacities.
- A bottle without rack space stays safely cataloged as Unplaced.
- Open Unplaced Bottles when a position becomes available.

8 Move or locate a bottle

Open a bottle to see each recorded location. Tap a location to jump directly to that cellar and highlighted position.

- Move transfers one copy to another open section.
- Removing from a section keeps the bottle in the collection.
- Drink removes one copy and records it in Consumed History.

9 Search and sort

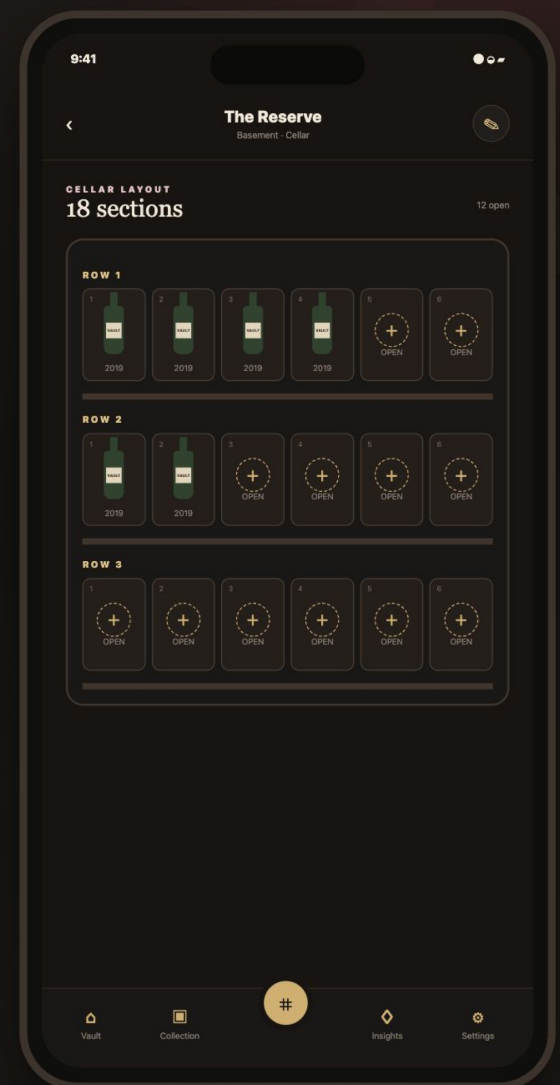

Search the whole collection or one cellar by name, vintage, varietal, grape, or drink-by date.

- Sort newest to oldest or oldest to newest.
- Drink by date shows the bottles to consider first.
- Search Active, Consumed, Unplaced, or a specific cellar.

BOTTLE VAULT

Every bottle has *its* place.

Custom numbered rows make any cellar, rack, or refrigerator easy to navigate.

Plan the bottle. Remember the moment.

10 Drinking windows

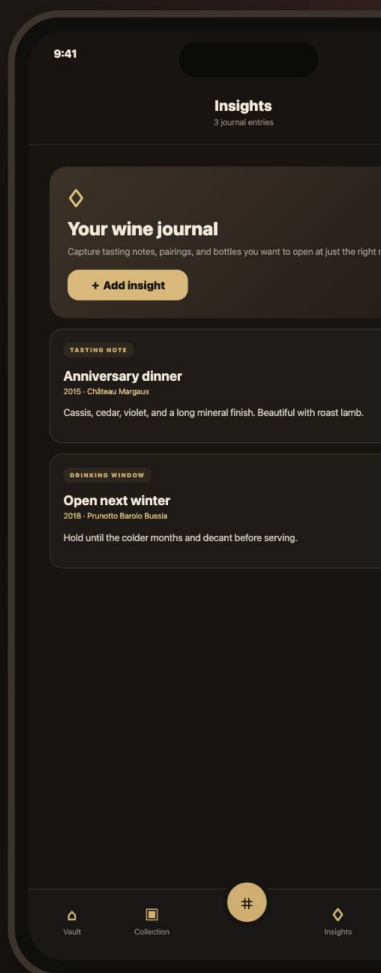

Use suggested windows as guidance, then adjust them for producer recommendations, storage conditions, and personal taste.

- Sort by drink-by date.
- Enable reminders for bottles approaching their window.

BOTTLE VAULT

Remember every b

Capture tasting notes, pairings, drinking windows, and the behind your wines.

11 Insights

Add tasting notes, ratings, pairings, and memories from a bottle page. They remain attached to that bottle and also appear together under Insights.

- Tap an Insight to return to its bottle.
- Consumed bottles retain their history.

12 Shared vaults

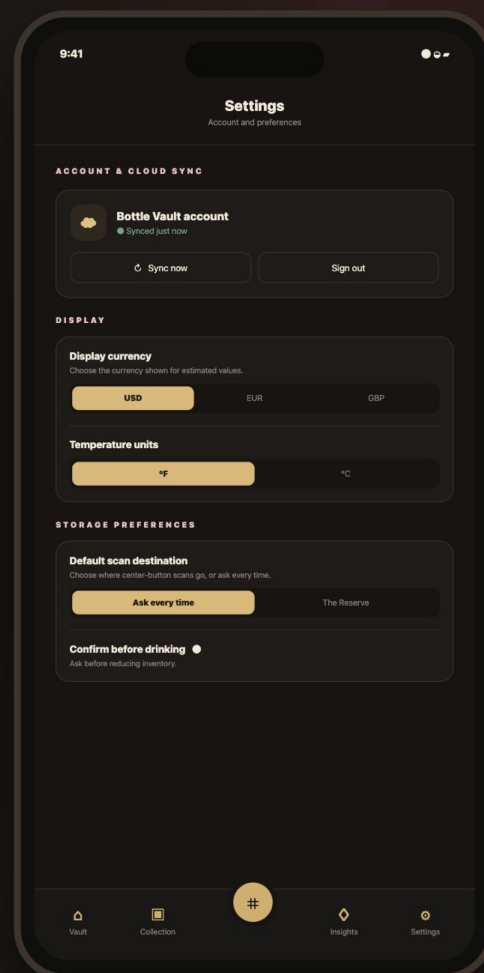

Invite a trusted collector as an editor or viewer using the email connected to their Bottle Vault account.

- Editors can add, place, move, and document.
- Viewers can browse without changing the vault.

BOTTLE VAULT

Your vault, *protected*.

Private cloud backup keeps cellars, bottles, layouts, preferences, and Insights synchronized.

PRIVATE · ORGANIZED · YOURS

Your Bottle Vault checklist

Confirm your account email before building a large collection.

Tap Add Bottle for AI scanning, a saved photo, or manual entry.

Review AI-generated details before saving.

Use quantity instead of scanning identical bottles repeatedly.

Place each copy or keep it in Unplaced Bottles.

Check the sync time after shared-vault changes.

Use Drink so inventory and Consumed History stay accurate.

Add Insights while the tasting memory is fresh.
